

MICAYLA D. FONG

Novato, California (415) 827-2230 mdfong3@dons.usfca.edu [linkedin.com/in/micayla-fong-3555f](https://www.linkedin.com/in/micayla-fong-3555f)

Data Science and AI graduate student with experience applying machine learning, data analysis, and software development to solve real world problems.

Education

University of San Francisco

M.S. in Data Science and Artificial Intelligence

San Francisco, CA

June 2026 - June 2027

University of Southern California

B.S. in Computer Science and Business Administration

Los Angeles, CA

May 2022 - May 2026

Experience

Business Operations Intern

Eppler Capital Funds

(Remote) Chadds Ford, PA

January 2026 - May 2026

- Developed and applied 3 optimized SOPs following database migration from Airtable to GoHighLevel.
- Engineered 4 automated workflows in GoHighLevel, using form submission and status change triggers, with conditional logic to route data across communication channels, reducing manual processing time by ~8 hours per week.
- Maintained and updated the company website weekly, supporting regular content deployments.
- Built and published recurring insight driven content, contributing to consistent data informed communication with external stakeholders, supporting CRM operations.

Undergraduate Research Assistant

Trojan Sports Research Lab

Los Angeles, CA

May 2025 - May 2026

- Co-author on the accepted abstract "Features of Female Baseball Players: A Pilot Study From the USC Women's Baseball Club," accepted for presentation at the 2026 American College of Sports Medicine (ACSM) Annual Meeting, reflecting the ability to contribute to a large collaborative project from data collection through submission.
- Collected and preprocessed performance data for a cohort of 20 female baseball players, structuring raw data for statistical analysis in an ongoing sports medicine research study.

Academic Projects

Data Scientist

Special Topics: Baseball Metrics

Los Angeles, CA

February 2025 - April 2025

- Performed linear regression analysis in R to determine statistically significant relationships between home game ratios and 8 other variables such as ERA, runs scored, and walks allowed.
- Reduced dimensionality of 120 years of historical team data using PCA and applied K-means clustering to uncover 3 distinct team profiles.
- Applied ANOVA tests to validate statistical differences across clusters, supporting deeper exploration into strategic implications of gameplay styles.
- Developed a Tableau dashboard with graphs and visuals to illustrate statistical relationships, enabling clear communication of performance patterns and findings to technical and non-technical audiences.

Full Stack Developer

Finance Web Application for College Students

Los Angeles, CA

August 2024 - November 2024

- Developed group expense tracking and management application using Spring Boot for backend and React for frontend.
- Followed an iterative development process over 4 months to build, test, and debug features such as expense splitting, payment settling, and budgeting.
- Designed and maintained a scalable MySQL database structure, ensuring efficient data handling and retrieval through rigorous testing and optimization.

Technical Skills

Languages: Python, Java, SQL, JavaScript, HTML, CSS

Tools: Spring Boot, React, MySQL, Tableau, Jira, Git, GitHub, Claude Code
